Presentations with Beamer

Technical Writing Class

Suraj Pathak

MNIT Jaipur

November 12, 2026

Outline

1. Basics
2. Content
3. Summary

What is Beamer?

Beamer is a LaTeX class for slide presentations.

- Slides are written as plain text
- Produces a PDF
- Same tools as LaTeX: math, tables, code

Overlays

1. Shown from the first click

Overlays

3. Appears on the third

Overlays

1. Shown from the first click
2. Appears on the second
3. Appears on the third

Only visible on step 4.

Blocks

Definition

A commit is a recorded snapshot of the project.

Warning

Never commit passwords or tokens.

Example

```
git commit -m "Add feature"
```

Columns

Git

- Version control
- Works locally

GitHub

- Hosting platform
- Pull requests

Math and Tables

$$\int_0^1 x^2\,dx = \frac{1}{3}$$

Tool	Purpose
Beamer	Slides
Doxygen	Code docs

Code

```
#include <iostream>
int main() {
    std::cout << "Hello";
    return 0;
}
```

Graphics with TikZ

Summary

- One `frame` per slide
- Use blocks, columns and overlays for structure
- Choose a theme with `\usetheme{...}`

Thank you!
